

## FM COMMUNICATOR

The FM Communicator lets you **manage your fleet in real-time**, regardless of where your vehicles are. You can track your fleet and have exceptions reported to you instantly. This helps you actively manage your vehicles, keeping you in control all the time.

### FEATURES

- Vehicle's distance and utilization, including driving, standing and idle time
- Actual distance driven in a period
- Standard and user-defined driving violations (e.g. over-speeding, harsh braking, cargo door open, temperature out of range, etc.)
- Driver identification and access control
- Driver scoring and error reporting
- Second-by-second incident analysis
- Routes driven (plotted on a map or in summary)

### BENEFITS

- Measure time and attendance
- Improve safety
- Reduce fleet costs
- Increase vehicle utilisation and staff productivity
- Better management control
- More motivated staff
- Controlled vehicle access
- Know where your vehicles have been and where they are right now
- Automate call sheets for mobile staff
- Check entry into unauthorised areas

### THE FIGURES SPEAK FOR THEMSELVES

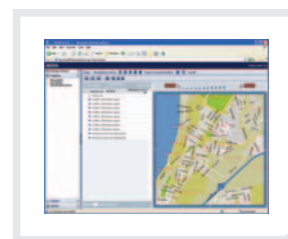

Customers using the **FM Communicator** solution:

- Double staff productivity
- Save 10% on insurance premiums
- Stop visits to unauthorised locations

## SOLUTION COMPONENTS

The **FM Communicator** on-board computer includes an internal GPS and GSM module to record GPS positions along with trip information and to allow remote communication between office and vehicle for active tracking and exception reporting.

The **driver code plug** can be used to identify drivers and control access to vehicles. The passenger code plug is an optional extra that can be used to identify passengers and their trips in your vehicles.

## WEB-BASED INFO SERVICE

FM-Web is an Internet based service that delivers your fleet information to you over the web.

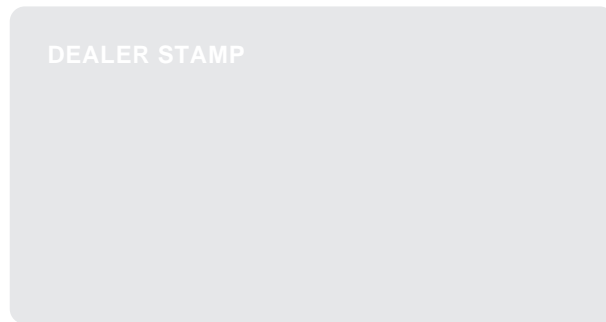

This service includes a web front-end which is feature-rich and allows you to manage your vehicle or fleet without the need to install any additional software on your PC.

Simply access the Internet from any workstation and securely log on. It allows you to receive the information, while the bureau service takes care of the administration of the fleet systems including the management of data, hosting facilities, etc. There is no need to install any software on your PC.

Your vehicle or fleet will be available to you at anytime, anywhere.

## BENEFITS

- Fixed monthly service fee which includes:
  - Communication costs
  - Stolen vehicle recovery
- A 24/7/365 national response center
- Information accessible anytime, anywhere
- No need to buy additional software and expensive maps
- Your data is managed in a secure hosting environment
- A user-friendly solution
- Ongoing return on investment
- Understand true cost of ownership from the beginning
