FM LOCATOR

The FM Locator helps you **manage your staff's time and improve the way they use your vehicles**. You can replay routes driven on a digital map or review summary reports that highlight who visited particular locations and when, thus improving customer service. You can also determine precisely how long a vehicle stopped at different locations and how often locations were visited.

FEATURES

- Vehicle's distance and utilisation, including driving, standing and idle time
- Actual distance driven in a period
- Standard and user-defined driving violations (e.g. over-speeding, harsh braking, entering no-go zones, etc.)
- Driver identification and access control
- Driver scoring and error reporting
- Routes driven (plotted on a map or in summary)
- Visits to locations (e.g. customers, suppliers, private, etc.)

BENEFITS

- Measure time and attendance
- Improve safety
- Reduce fleet costs
- Increase vehicle utilisation and staff productivity
- Better management control
- More motivated staff
- Controlled vehicle access
- Know where your vehicles have been and where they are right now
- Automate call sheets for mobile staff
- Check entry into unauthorised areas

THE FIGURES SPEAK FOR THEMSELVES

Customers using the **FM Locator** solution:

- Double customer visits
- See customer satisfaction rise by 25%
- Reduce mileage

MOBILE INFORMATION EXCHANGE

SOLUTION COMPONENTS

The **FM Locator** on-board computer includes an internal GPS and GSM module to record GPS positions along with trip information for passive tracking and location management purposes.

A number of **communication options** are available to help you minimise and control your communication costs. Data can be transferred manually via code plug, optional GSM or wireless modem.

The **driver code plug** can be used to identify drivers and control access to vehicles. The passenger code plug is an optional extra that can be used to identify passengers and their trips in your vehicles.
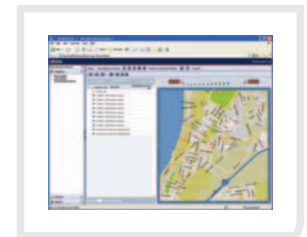

WEB-BASED INFO SERVICE

FM-Web is an Internet based service that delivers your fleet information to you over the web.

This service includes a web front-end which is feature-rich and allows you to manage your vehicle or fleet without the need to install any additional software on your PC.

Simply access the Internet from any workstation and securely log on. It allows you to receive the information, while the bureau service takes care of the administration of the fleet systems including the management of data, hosting facilities, etc. There is no need to install any software on your PC.

Your vehicle or fleet will be available to you at anytime, anywhere.

TERMS AND CONDITIONS APPLY
